**PETITION ESTABLISHING THAT NO PAGES  
WERE OMITTED FROM THE SPECIFICATION**

This paper is being filed in response to Notice to File Missing Parts dated October 20, 2003.

Applicant's undersigned attorney has first-hand knowledge of the facts set out herein and, on behalf of Applicant, hereby petitions to the fact that page 2 of the specification was not omitted as explained below:

1. Applicant filed the above-referenced patent application on July 16, 2003.
2. Applicant misnumbered the specification by having the Abstract numbered page 1 and the first page of the Specification numbered page 2. Consequently, the second page of the specification was numbered page 3 and the subsequent pages were numbered in sequence.
3. A Notice of Missing Parts issued indicating that page 2 appears to have been omitted from the application.
4. Because of Applicant's misnumbering of the application, no pages were omitted from the specification and Applicant submits herewith a Preliminary Amendment correcting the page numbers of the specification.
5. Fee (37 C.F.R. 1.17(h)) of \$130 (Small Entity.)

A check in the amount of \$130.00 is enclosed herewith.

Please charge any additional fees required by this paper or credit any overpayment to Deposit Account No. 23-2820.

A duplicate of this paper is attached.

Declaration

All statements made of the declarant's own knowledge are true and all statements made on information and belief are believed to be true..

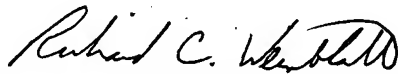

1. Applicant misnumbered the specification by having the Abstract numbered page 1 and the first page of the Specification numbered page 2. The second page of the specification was numbered page 3.

2. Because page 2 of the specification was numbered page 3, it was not omitted when the application was filed.

3. Applicant submits herewith a Preliminary Amendment correcting the page numbering of the specification.

The undersigned, being hereby warned that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. 1001) and may jeopardize the validity of the application or any patent issuing thereon declares that all statements made of his own knowledge are true and that all statements made on information and belief are believed to be true.

Respectfully submitted,
